

BELO

William M. Besse
Director/Corporate Security

To Whom It May Concern:

I retained the services of Mayday International here in Dallas. I asked Avi Niv to provide an overview of both international and domestic terrorism risk, techniques and countermeasures to our Corporate Security staff and Security Officers. I also requested that Avi spot check our various fixed and mobile security posts associated with the downtown Dallas Corporate Campus and a major suburban Plano, Texas, Dallas Morning News manufacturing/printing facility.

Avi and his team did what I can best describe as a fantastic job tailoring the program to our corporate setting. Our officers, receptionists and other staff members received excellent training in Behavior Pattern Recognition, which they continue to use every day in a wide variety of assignments. Since our downtown campus is located in an urban setting, they also use this training to deter and detect criminal behavior as well.

Avi Niv is one of the more knowledgeable counterterrorism experts I have had the pleasure of meeting and associating with. Aside from my corporate security experiences, I served as a U.S. Army Counterintelligence Special Agent. I can honestly say that the training and insights Avi Niv provides is in many ways superior to any other training I have received. Avi speaks several languages including Arabic, Spanish and Hebrew. He has lived with these problems, arrested terrorists, interrogated them and spoken to them personally. You might say he knows what makes them tick, how they work and most importantly, how to defeat them. What better training can you get than from someone who knows the tactics and speaks the language of these radical extremists?

I highly recommend him to you.
